

## **ASC eNews Quarterly Newsletter September 2013**

### **A Note of Appreciation**

*Reeta Garber*

The ASC Program would like to recognize Reeta Garber for her leadership in designing and developing programmatic communications tools and activities and to wish her the very best as she retires (again) to begin a new phase in her life.

Since 1998 Reeta has supported the ASC Program as an important member of the core team responsible for spreading the word about DOE/NNSA laboratory and Federal efforts in high performance computing. Reeta worked for Sandia for 20 years and retired in 2010 as a Distinguished Member of the Sandia Technical Staff. From 2002 to 2010 she served as the ASCI/ASC Program Communication Manager. During this time she developed everything from ASC logos to web sites and technical documents; all designed within the common “look and feel” for programmatic materials that she knew was essential to communicate the importance and complexity of advanced simulation and computing activities. Reeta’s standards for quality and her professionalism resulted in high levels of credibility for ASCI/ASC communication materials and events.

For the past three years Reeta has continued to apply her expertise to the quarterly ASC eNews. She also served as project manager for the ASC Russia program and oversaw creation of a web page describing collaboration activities between the DP labs and their Russian counterpart organizations.

We thank Reeta for a job well done and wish her well!
