Curtis,

I should have copied you on this. Our assessment is that the 2000 assessment is still valid. Thanks.

Kasia

Subject: RE: Nonproliferation assessment

Drew,

We have completed our analysis and it is our collective view that the interagency assessment from 2000 is still valid. We are not aware of any changes in U.S. nonproliferation policy or regulations that would change previous USG assessments. Please let me know if you have any further questions.

Kasia Mendelsohn

Please send me a copy of the nonproliferation assessment prepared to support the SPD SEIS. The NA-20 program owners have committed to reviewing it and determining if it needs to be updated, but they don't have a copy of it .
