Conversation took place on 8/15/2008 (DATE) at 11:00 AM (TIME)

Type of Conversation (specify): Phone Other _____
 In Person
 Teleconference

Conversation initiated by: Robert Werth, SAIC (name, organization and phone)

Conversation involved [name, organization and phone]:
Nicole Bulgarino, Ameresco Federal Solutions

Issues Discussed:
D-Area biomass facility modeling and PM2.5 concerns in the Aiken/Augusta area.
The facility will be permitted under PSD rules as a source of CO. They did modeling for SC Standards 2 and 7. They modeled for PM10, not PM2.5. The state considers PM10 to be representative for PM2.5.
She will send copies of the applications to the state. They used the same SRS inventory that DOE used for their most recent modeling (Title V permit application).
