

Welcome to the Palmetto Parkway Website!

The I-520 Phase II of the Palmetto Parkway consists of the completion of I-520 from US Route 1 to I-20 along this new location for approximately 6.5 miles. Due to its functional class and its connection to I-20, a multidirectional interchange will link the two interstate facilities.

The project is a controlled access four lane divided interstate facility including three interchanges and 13 bridges. This project also includes roadway improvements to the ramps at the US Route 25/I-20 interchanges, SC Route 126 (Clearwater Road), Road S-33 (Ascauga Lake Road), and various secondary and local roads to accommodate the I-520 alignment.

A connector road will be constructed from US Route 25 to I-520 to link the two facilities. This project shall be completed within 31 months.
