Attachments: SRNS-N2000-2011-00039.pdf

Attached is the paper from SRNS describing the CSD and its changes to the environmental impacts.

We all agree with your proposal to add it to the sensitivity section of Chapter 4.

A few changes from the last version. Bob Pierce provided me with an STI reference and the facility

Fw VSD Document.txt

indicated that a more recent scrub of Pu oxide mass indicates the possibility to act on 750 kg versus the previous 500 kg. I've signed this version but the scanner in our building is locked out. I'll have it scanned shortly and then move it on to STI.
