John,
 I talked with URS (PDCF Design Agency) in Denver (and they sent me a drawing of what they considered PDCF land use in F) and I also talked with WSB, and we've landed on the following for land use for the SEIS:

MFFF: 86.7 acres (Process Building as well as Support Building)
 WSB: 15 acres
 PDCF: 50 acres
 Total: 152 acres

The WSB acreage increased from 9.0 to 14.74 when they added parking and equipment laydown. The drawing we had sent you before has been revised to reflect the above values and it is undergoing STI review. As soon as we get it back, I will send it to you... I hope you don't have to change too many references. Brent has agreed with this latest distribution.

Keith/Brent

Which numbers are correct?

Cynthia

Looks good except the acreages don't match the values previously provided by Brent Blunt in his Wed 1/19/2011, 4:31 PM email.

Brent Blunt email:

MFFF: 86.7 acres
 WSB: 9 acres
 PDCF: 50 acres
 Total: 146 acres

New Drawing:

MFFF: 74 acres
WSB: 15 acres
PDCF: 21 acres
Total: 110 acres

John,

Please review the attached drawing and determine if it will meet your needs. We may need to change the title. This document has been through an STI review and is approved for public release.
