Subject: K-Area and F-Area Accidents

Importance: High

Attachments: K-Area_and_F-Area_NEPA_Accidents_R5_Revised.xls;
revised_nepa_source_document_accident_text.doc
John,

The attached is an update of accidents for the PDC combo project at K-Area and PDCF at F-Area – with beyond design basis accidents. This information will also be provided in the update to the NEPA Source Document. The text and formatting will be modified by editors but is expected to stay the same in the next version of the NEPA Source Document. Any substantive changes will be coordinated with you.

The attached documents have received a classification review and were determined to be unclassified and not UCNI. As such, both documents are marked U/NU.

Cynthia – this information answers Action Item #76 from the list you sent out on your 12/21/10 e-mail.

Thanks,

Randy
