Subject: Reduced Scope PDC
Attachments: 2011 Update of 2010 SPD SEIS Preparation PDC and PuP Data Call (U-NU).doc
Importance: High

John,

Attached is an update to the SPD data call originally provided in September 2010. This update provides a preliminary qualitative assessment of the recently announce reduced scope option for PDC. The only changes to this version of the data call are in column # 2 in red type. Information in other columns of this attachment were not altered but may have been subsequently updated by separate data submittals since September 2010. Meetings are currently underway to further define the reduced scope option so I would expect additional changes as we move forward. We are also in an effort to make a quantitative assessment and will provide that information within a couple of weeks.

Please don't hesitate to contact us for clarification or to discuss any aspect of this new option.

This attachment received a classification review and has been determined to be unclassified and not UNCI – marked as U/NU.

Thanks,

Randy
