Kirk,

For 2004:

BGN 112 mR/year

Hwy. 301 77 mR/year

Let me know if you need anything else.

Jim

Jim,

I just realized that the 2004 data are not included. Could you provide those also? We are in that odd part of the year when some of the "new" environmental data are becoming available. For the draft SPD SEIS, we are using 2004 – 2008 data; when we revise for the final, we will use the 2005 -2009 data. Therefore, I intended to request 6 (rather than 5) years to get it all in one request. Sorry for the confusion.

KO

Kirk,
BGN is an acronym for what is locally known here as the Burial Grounds, a.k.a., E-Area. It is the approximate center of SRS.

Glad to help.

Jim,
Yes, this appears to be what we were after. One last thing – what does BGN stand for?

Thank you,

Hi Kirk,

I am assisting in the data call at Savannah River Site for the SPD SEIS. In reference to your latest request regarding annual external dose rates near the center of SRS and at the Hwy. 301 offsite location, please refer to the attached table. Is this what you are looking for?

Thanks,

Jim
