NOTES:

1. S* is any undefined storage time equal to or greater than 9 months, but less than 18 months.

2. All times shown date from stockpile storage or last storage inspection test (SIT), which must be performed every 18 months.

3. Movement from one storage location to another requires no testing unless a WAT is desired to put the bomb in a ready condition. A WAT is the only test that is necessary for the reacceptance of a bomb should an acceptance test be required.

4. Institution of a weapon into the storage cycle after an aborted mission requires no more preparation or testing above that required for movement of the bomb from one location to another, provided humidity protection is maintained the capsule is removed immediately.

** For Mk 15 Mod 0 Bomb only.

Information for Requester

Pursuant to Title 10, Code of Federal Regulations, section 1004.6 (10 CFR 1004.6), the Office of Nuclear and National Security Information (ONNSI) in the Department of Energy (DOE) has completed its review of the documents responsive to your request. Twenty one documents, located in the files of the Albuquerque Operations Office, contain information properly classified Restricted Data . Those few portions of the documents that are not classified are so inextricably intertwined with the classified information that removal of the classified information would result in the release of no meaningful information. We are, therefore, denying the subject documents in their entirety.

Title 5, United States Code, section 552(b)(3) (5 U.S.C. 552(b)(3)) (exemption 3), exempts from disclosure information "specifically exempted from disclosure by statute (other than section 552(b) of this title), provided that such statute (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld . . . ." The Atomic Energy Act (AEA) of 1954, as amended, 42 U.S.C. 2011 et seq., is an exemption 3 statute. Sections 141-146 of this Act (42 U.S.C. 2161-2166) prohibit the disclosure of information concerning atomic energy defense programs that is classified as Restricted Data (RD) pursuant to the AEA. The portions deleted from the subject documents pursuant to exemption 3 contain information about weapon design and illegible information that has been classified as RD. Disclosure of the exempt data could jeopardize the common defense and the security of the nation.

To the extent permitted by law, the DOE, pursuant to 10 CFR 1004.1, will make available records it is authorized to withhold under the Freedom of Information Act (FOIA) whenever it determines that such disclosure is in the public interest. With respect to the

information withheld from disclosure pursuant to exemption 3, the DOE has no further discretion under the FOIA or DOE regulations to release information currently and properly classified pursuant to the AEA.

Pursuant to 10 CFR 1004.6(d), Mr. Roger K. Heusser, Director, ONNSI, is the official responsible for the denial of the DOE classified information.

Pursuant to 10 CFR 1004.8, the denial of a FOIA request may be appealed, in writing, within 30 days after receipt of a letter denying any portion of the request, to the Director, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585. The written appeal, including envelope, must clearly indicate that a Freedom of Information appeal is being made, and the appeal must contain all other elements required by 10 CFR 1004.8. If other agencies have denied information within this response, DOE will coordinate the appeal with those agencies. Judicial review will thereafter be available to you in the District of Columbia or in the district where: (1) you reside, (2) you have your principal place of business, or (3) the Department's records are situated.

OpenNet Requirements

All documents declassified and publicly releasable on or after October 1, 1994, must have bibliographic information made available to be entered into the Department of Energy (DOE) OpenNet database. The minimum requirements are as follows:

1) Accession number to uniquely identify the document
2) Title of the document
3) Location of the document (where the public can obtain a copy)
4) Originating organization
5) Document type (memo, letter, report, etc...)
6) Declassification status (declassified, sanitized, never classified, etc...)

Software that is compatible with the OpenNet is available from Office of Scientific and Technical Information and may be obtained by calling Mr. Barry Steele at (423) 576-9372.

If you are currently maintaining an electronic card file, please contact Mr. Steele at (423) 576-9372 to arrange downloading of the data into the proper format for OpenNet.

A copy of each declassified document as well as a floppy disk containing the required bibliographic information must be sent to the DOE public reading room. Additional information regarding OpenNet may be obtained from Mr. Dan Young at (301) 903-9970.
