January 16, 2015

MEMORANDUM FOR DISTRIBUTION

FROM: JAMES J. MCCONNELL   
ASSOCIATE ADMINISTRATOR  
FOR SAFETY, INFRASTRUCTURE AND OPERATIONS

SUBJECT: Guidance for the National Nuclear Security Administration's Fiscal Year 2016 Ten Year Site Plans.

The standing guidance for National Nuclear Security Administration's (NNSA) Fiscal Year (FY) Ten Year Site Plans (TYSPs) provided in my May 3, 2013 memorandum remains in effect with one exception - the list of mission capabilities in the standing guidance should be replaced with the mission capabilities used during the recent determinations of Mission Dependency Index. As stated in that guidance FY 2016 TYSPs are due 60 days after the release of the President's Budget, currently anticipated for February 2, 2015.

The Core Infrastructure, Risk-Informed Strategic Planning (CRISP) team will be exploring a simplified process for future TYSPs. Our goal is to automate the production of TYSPs using information collected in G2. We will host a one day workshop at a date to be announced later to provide your staff and contractors the opportunity to help us develop correct data fields for G2. The timing of this workshop will be discussed during the next CRISP meeting.

Please direct any questions or comments guidance to Jefferson G. Underwood, Director, Office of Infrastructure Planning and Analysis at (202) 586-4134.
