

Surplus Plutonium Disposition Supplemental Environmental Impact Statement (SPD Supplemental EIS)

Sites Affected by the Proposed Alternatives in the Surplus Plutonium Disposition Supplemental EIS

Sequoyah Nuclear Plant – Tennessee

Tennessee Valley Authority's Sequoyah Nuclear Plant, is located on 525 acres beside Chickamauga Reservoir in Soddy-Daisy, Tennessee. The plant's maximum capacity is 2,320 megawatts, enough electricity to meet the needs of about 1.3 million homes.

Waste Isolation Pilot Plant – New Mexico

The Waste Isolation Pilot Plant (WIPP) is located 26 miles southeast of Carlsbad, N.M. in the remote Chihuahuan Desert of Southeastern New Mexico. It is the world's first underground repository licensed to safely and permanently dispose of transuranic radioactive waste left from the research and production of nuclear weapons. Project facilities include disposal rooms mined 2,150 feet underground in a 2,000-foot thick salt formation that has been stable for more than 200 million years.

Browns Ferry Nuclear Plant – Alabama

Tennessee Valley Authority's Browns Ferry Nuclear Plant is located on 840 acres beside Wheeler Reservoir on the Tennessee River, near Athens, Alabama. The plant's maximum capacity is 3,440 megawatts, enough electricity to meet the needs of about 2 million homes.

Savannah River Site – South Carolina

DOE's Savannah River Site covers 198,344 acres in southwestern South Carolina. The site is approximately 12 miles south of Aiken, South Carolina, and 15 miles southeast of Augusta, Georgia. SRS processes and stores nuclear materials in support of national defense and U.S. non-proliferation efforts.
