Subject: FW: FIMS USAGE GROSS FEET TOTAL SUMMARIES

Ellen,

Sorry it took a few days. The hard numbers for facility usage are listed below. Percentages are as follows:

Office	31%
Other	7%
Laboratory	46%
Storage	8%
<u>Support</u>	<u>8%</u>
Total	100%

Since 2000 we have identified ten new developments that were built on undeveloped land for a total of 61.9 acres of land converted from undeveloped to developed. Although we do not have an acreage, it is fair to point out large sections of land have had their facilities removed (D&D'ed) and the land is slowly returning to an undeveloped condition. I would expect the acreage within TA 16 alone to exceed 62 acres. The Laboratory has demolished 1.4 million square feet since 2002 (through FY2011) and built 700 thousand new square feet since then. That is a net reduction of 7% in facility square footage.
